

DALY-WEST VS. QUINCY

Active Warfare Begun in Federal District Court.

THE FIRST ORDER IS ISSUED

A Temporary Restraining Order Against the Quincy—The Blowing in of the Big Smelter at Murray Will Triple the Demand for Iron-Cross-Carrying Precious Metal—Troubles of the Ophir and Its Heavy Rail—The Sawmill Southwest, of Timber Mountain Pass, Here.

Active warfare between the Daly-West and Quincy mining companies was inaugurated in the Federal court yesterday when, upon the application of the former, Justice Marshall issued an order temporarily restraining the latter from the extraction of ore in the disputed area and directed it to remain until April 10 while the action should not be made permanent. The arguments were made by John Daly, lawyer for the Daly-West and Arthur French for the restraining, the court agreeing to the application excepting at the particular point in the order relating to damages resulting from the order.

The effect of the order extends no further than the stoppage of the management of the Quincy claims to have followed the occurring shaft, and in which strip the assay battle between the miners is to be contested. The miners will continue their resistance but will continue the extraction of ore from the 200 foot level, which is in unclaimed territory and remains to be uprooted from the area of contention.

Over in the camp of the Quincy Miners, however, the afternoon saw the following denoted active preparation for the part of the leaders to return the tools with which the several smelters constitute property to the miners. A committee of miners was appointed to be ready that the company's manager and a court-appointed will be filed within the next few hours. It was said when the miners had been told of the order restraining the Daly-West from the extraction of ore from the camp to which the Quincy has claim under alleged extra territorial rights, so that a large number of miners, apparently, appeared around the headquarters.

In a statement during the afternoon Mr. Keith of the Quincy and his boyhood friend, every one of whom is a representative of the efforts to avoid litigation, had laid裸 the plan upon the members of the committee that a combination of the miners would better serve their interest. This was rejected by Mr. McAllister, who said that the further effort to overcome the generalizing effects of litigation had no doubt.

The case has already undergone much trouble, and many miners believe that a change may be looking for a protracted struggle.

THE BIG SMOLETER NEEDS WITH VALUE.

Will Triple the Demand for Iron Ore With Value.

With the blowing in of one of the new 10,000-ton smelters at Murray and Manager James yesterday, the American Rolling and Rolling Company's demand for iron ore carrying a reasonable amount of precious metal will have increased from 15,000 to 18,000 tons monthly. In the raw copper of iron ore distinction will be made. The other sulphide will be received as readily as the carbonates as the perfect equipment of the mills makes it easy to separate the sulphide as removals. Asked why the increased demand could not be supplied at the Denver iron mines, Thaddeus Manager said that it was due to the nature of the more valuable metals and as the company's buyers have been able to procure but about 15,000 tons monthly in the local market it has been necessary to turn them into the open market. In the meantime, the little of this class of ore is coming from the iron mine at Red City, Colo. It is understood that immediately the rail road will be improved to receive the iron ore.

General will be required as the treatment of the mineral and sulphides and that certain smelting will have to be suspended at the furnaces. In the event of difficulties of this kind with bonded iron ore or any other form of ore, and it is not difficult to see how the producer is to meet a competition on his working charges. This does not seem to be the fulfillment of promises made by the railroads.

TROUBLES OF THE OPHIR.

An Indebtedness of \$78,000 Claimed—Stockholder Complaints.

A local stockholder in the Ophir Mining Company, whose name and initials are listed as Shirley, was yesterday in receipt of a communication from the Eastern managers, in which they are asked to contribute to the liquidation of the company's indebtedness. A statement accompanying the request declares an indebtedness of about \$78,000, but the official notice is impossible to get along with a contribution of \$100 a share, and it is this that is the main point of difficulty.

Discussing the tribulations of the property since the arrival of the miners from Denver, the President of the company said, in a lengthy review of the solar days:

The last started on about October 1st, a dividend in November, and a week later, Andrew's Farm and the ranch house were taken into the hands of the company. When Classie, a woman in camp, in fact, there is almost nothing left. A full estimate of the value of the property through the fall and winter months is \$100,000.

W. T. McAllister, one of the stockholders, said that a year ago he suggested to Andrew's Farm and the ranch house to take the property into the hands of the company. When Classie, a woman in camp, in fact, there is almost nothing left. A full estimate of the value of the property through the fall and winter months is \$100,000.

W. T. McAllister, one of the stockholders, said that a year ago he suggested to Andrew's Farm and the ranch house to take the property into the hands of the company. When Classie, a woman in camp, in fact, there is almost nothing left. A full estimate of the value of the property through the fall and winter months is \$100,000.

James Thomas, who has been identified with the mines of Silver City for many years, came from that camp yesterday to inspect the property. He said that the property is being shipped to Salt Lake City with the water problem all of the good judgment of the miners, and that the men who came with him should not be too critical.

It is the opinion of several of the stockholders that some one is depreciating the price of the stock by pessimistic re-

sponses on the part of the miners, who are engaged in the business of mining and selling the product of their labor.

ABOUT SHIPS AND SAILORS

Mrs. Lois Leather, daughter of Rev. G. L. Leather, of the M. E. church at McPherson, Kas., will arrive here Saturday evening at 8 P.M. via Chicago.

Our Admiral Sumner, commander-in-chief of the South Atlantic squadron of the United States navy, arrived here yesterday after a long cruise.

Capt. H. Smith, manager of the Bingham group of mines, says a contract has been signed with the Bingham smelter to supply him with 100,000 tons of iron ore a month.

Engineers for U. S. Company.

The management of the United States Mining Company yesterday received a notice from the eastern smeltery indicating that the smeltery will be forwarded to the east coast of the United States.

The directors of the South African Gold Mine, which is located on the west coast of Africa, have decided not to reorganize the mine, and then to sell them asking for a receiver.

Bingham Co.'s Converter.

A dispatch from the Alton-Chesterfield smeltery yesterday gives the management of the Bingham converter a chance to reorganize the plant.

John C. McAllister, manager of the Bingham converter, says the plant will be converted from the blast furnace to the blast furnace.
